

JAMES DELOS REYES

Full Stack Engineer | TypeScript · React · NestJS · Node.js | AI Integration (OpenAI, RAG) | 8 yrs
Cebu, Philippines · sabakhadhaoy@gmail.com · +63 961 641 0822 · linkedin.com/in/jamesakvich

SUMMARY

Full stack engineer with 8 years of experience across React/TypeScript frontends and Node.js backends, currently building an AI-powered recruitment platform. Designed and built a 9-module admin SPA end-to-end on a custom design system, and developed AI chat features on OpenAI. Comfortable owning features from UI through API integration to production.

EXPERIENCE

Full Stack Developer — Jobvious

Apr 2025 – Present

Cebu, Philippines (on-site)

AI-powered recruitment and referral platform. TypeScript workspace of 11 services: React SPAs (Vite), NestJS APIs, MySQL/Prisma, MongoDB, Redis, Socket.io, and OpenAI-powered matching with Qdrant vector search; Dockerized with GitHub Actions CI.

- Designed and built the full redesign of the admin platform: a 9-module React + TypeScript SPA (Tailwind, Radix UI, TanStack Query, Zustand) covering approvals, participant management, notifications, messaging, timesheet export, and moderation — on a custom design system with hand-coded SVG data visualizations.
- Built AI chat support (OpenAI) for profile completion, job-matching queries, and referral guidance, reducing manual support work for the operations team.
- Developed participant-facing modules — onboarding, resume upload, profile management, and referral workflows — as mobile-first responsive UI on a reusable component architecture.
- Integrated real-time messaging and notification features (Socket.io) for job-match alerts and referral status updates.
- Implemented API integrations between frontend, backend services, and AI features to keep data flow consistent across the platform.

Senior Software Engineer — Accenture

Aug 2022 – Apr 2025

Cebu, Philippines

- Built mobile-responsive web applications with React.js and Node.js for enterprise clients.
- Designed database schemas for scalable applications on MySQL and PostgreSQL.
- Deployed via CI/CD pipelines (Jenkins, Docker, AWS), reducing deployment time by 30%.
- Optimized application performance, improving load times by 25% through profiling and bottleneck resolution.
- Integrated third-party APIs and wrote unit and integration tests as part of standard delivery.

Back End Developer — GoTeam

Jun 2021 – Aug 2022

Philippines

- Developed backend services and new features in Node.js/Express.js.
- Debugged and resolved performance issues, improving API response times by 20%.
- Wrote unit and integration tests; collaborated with frontend developers on API design.

Software Engineer — Tech Mahindra

Mar 2020 – Jun 2021

Cebu, Philippines

- Built automated C#/ .NET desktop applications for web data collection, improving efficiency by 40%.
- Built a React.js web application for the recruitment team, replacing manual workflows.
- Automated email extraction, saving 10+ hours of manual work weekly.

Software Engineer — M Lhuillier Financial Services

Jun 2018 – Mar 2020

Cebu, Philippines

- Migrated a C# desktop application to a React.js web application, improving accessibility and user experience.
- Rewrote existing APIs from C# to Node.js, improving performance and scalability.
- Integrated third-party APIs and handled ongoing maintenance and testing.

TECHNICAL SKILLS

Core: TypeScript, JavaScript, React, Node.js, HTML/CSS, Tailwind CSS, Radix UI, TanStack Query, Zustand, REST APIs, MySQL, PostgreSQL, Git

Working knowledge: NestJS, Prisma, Socket.io, OpenAI API, C#/.NET, Docker, GitHub Actions, Vitest, Testing Library, MongoDB, Capacitor, AWS S3

Familiar: Redis, BullMQ, Qdrant (vector search), Playwright, Strapi

EDUCATION

BSc Information Technology — Cebu Eastern College

2014 – 2018

LANGUAGES

English (professional working proficiency) · Filipino/Cebuano (native)
